Professional Mixing Workshop Series: Elevate Your Skills in the Art of Mixing

WELCOME

We offer 3 different Workshop Models

Our offerings include three unique models, each tailored to different levels of experience and depth. Whether you are just beginning to refine your skills, looking to master advanced techniques, or seeking insight into professional mixing workflows, these workshops provide the essential knowledge and practical tools needed to take your mixes to the next level.

01

Mix Deconstruction

1 Day (6 hours)

online or on-site

02

Mixing Basics

3 Days

online or on-site

03

Advanced Mixing

3 Days

online or on-site

Each course is available in both **online** and **in-person** formats, providing flexibility for remote learners and those who prefer a hands-on environment.

Workshop Model 1

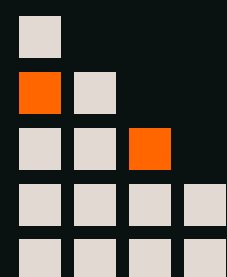

Mix Deconstruction Workshop (1 Day)

Overview

This one-day workshop is crafted for individuals with a foundational understanding of mixing. Designed to deepen their comprehension of professional workflows, this workshop dissects a completed mix to reveal the nuanced decisions that contribute to a polished sound. Participants will engage with real-world examples, exploring the finer points of session structure, creative effects, and problem-solving within a mix.

Who Should Attend

This workshop is ideal for those with a working knowledge of mixing concepts, such as EQ, compression, and session setup. Perfect for those wanting to elevate their skills by observing and analyzing the techniques that transform a raw session into a cohesive, professional mix.

Workshop Model 1: MIX DECONSTRUCTION

Course Outline

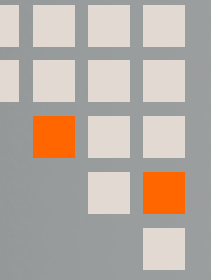

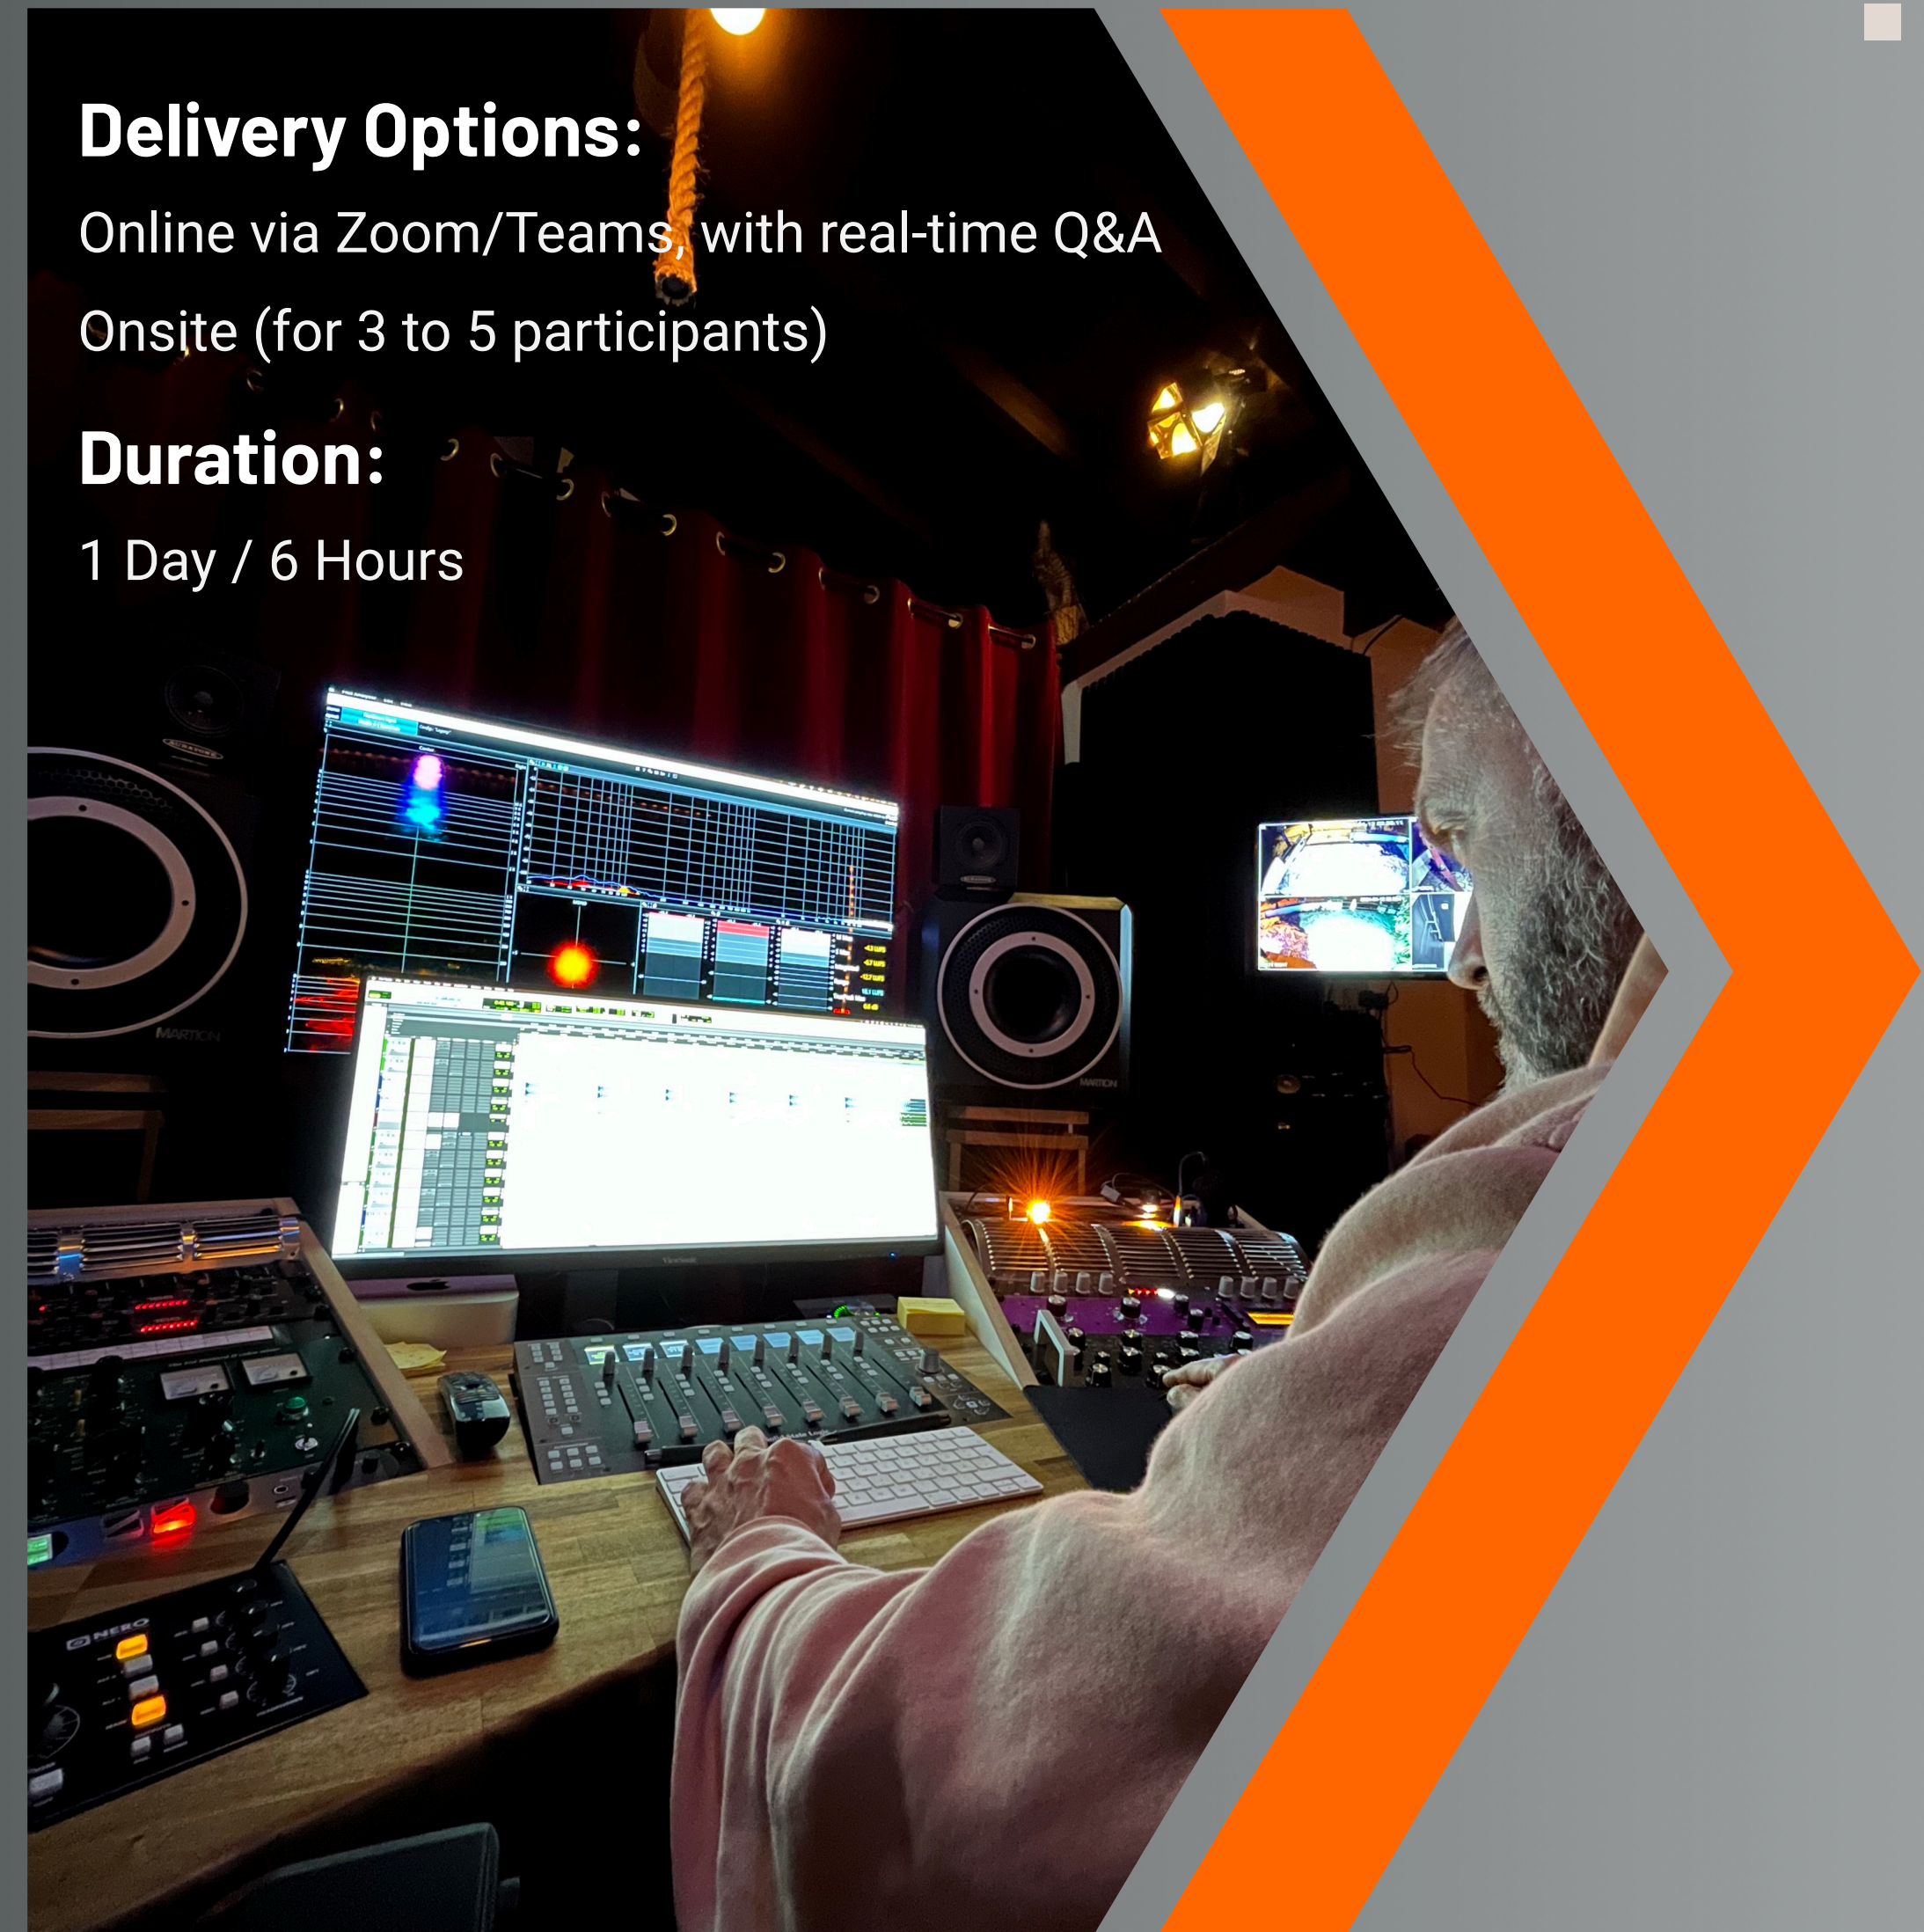

- ✓ **Bus Structuring & Gain Staging**
Efficient organization and precise level management
- ✓ **Low-End Management**
Achieving clarity and impactful depth in the bass range
- ✓ **Depth Staging**
Creating spaciousness and dimensionality in the mix
- ✓ **Powerful Drums**
Techniques for punchy, dominant drums that drive the mix
- ✓ **High-End Vocal Mixing**
Bold, shimmering vocals that enhance and carry the mix
- ✓ **Secret Weapons – Saturation & Parallel Compression**
Techniques for added warmth and punch
- ✓ **Interactive Q&A and Live Discussion with the Instructor**

Delivery Options:

Online via Zoom/Teams, with real-time Q&A
Onsite (for 3 to 5 participants)

Duration:

1 Day / 6 Hours

Workshop Model 2

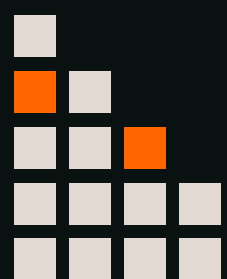

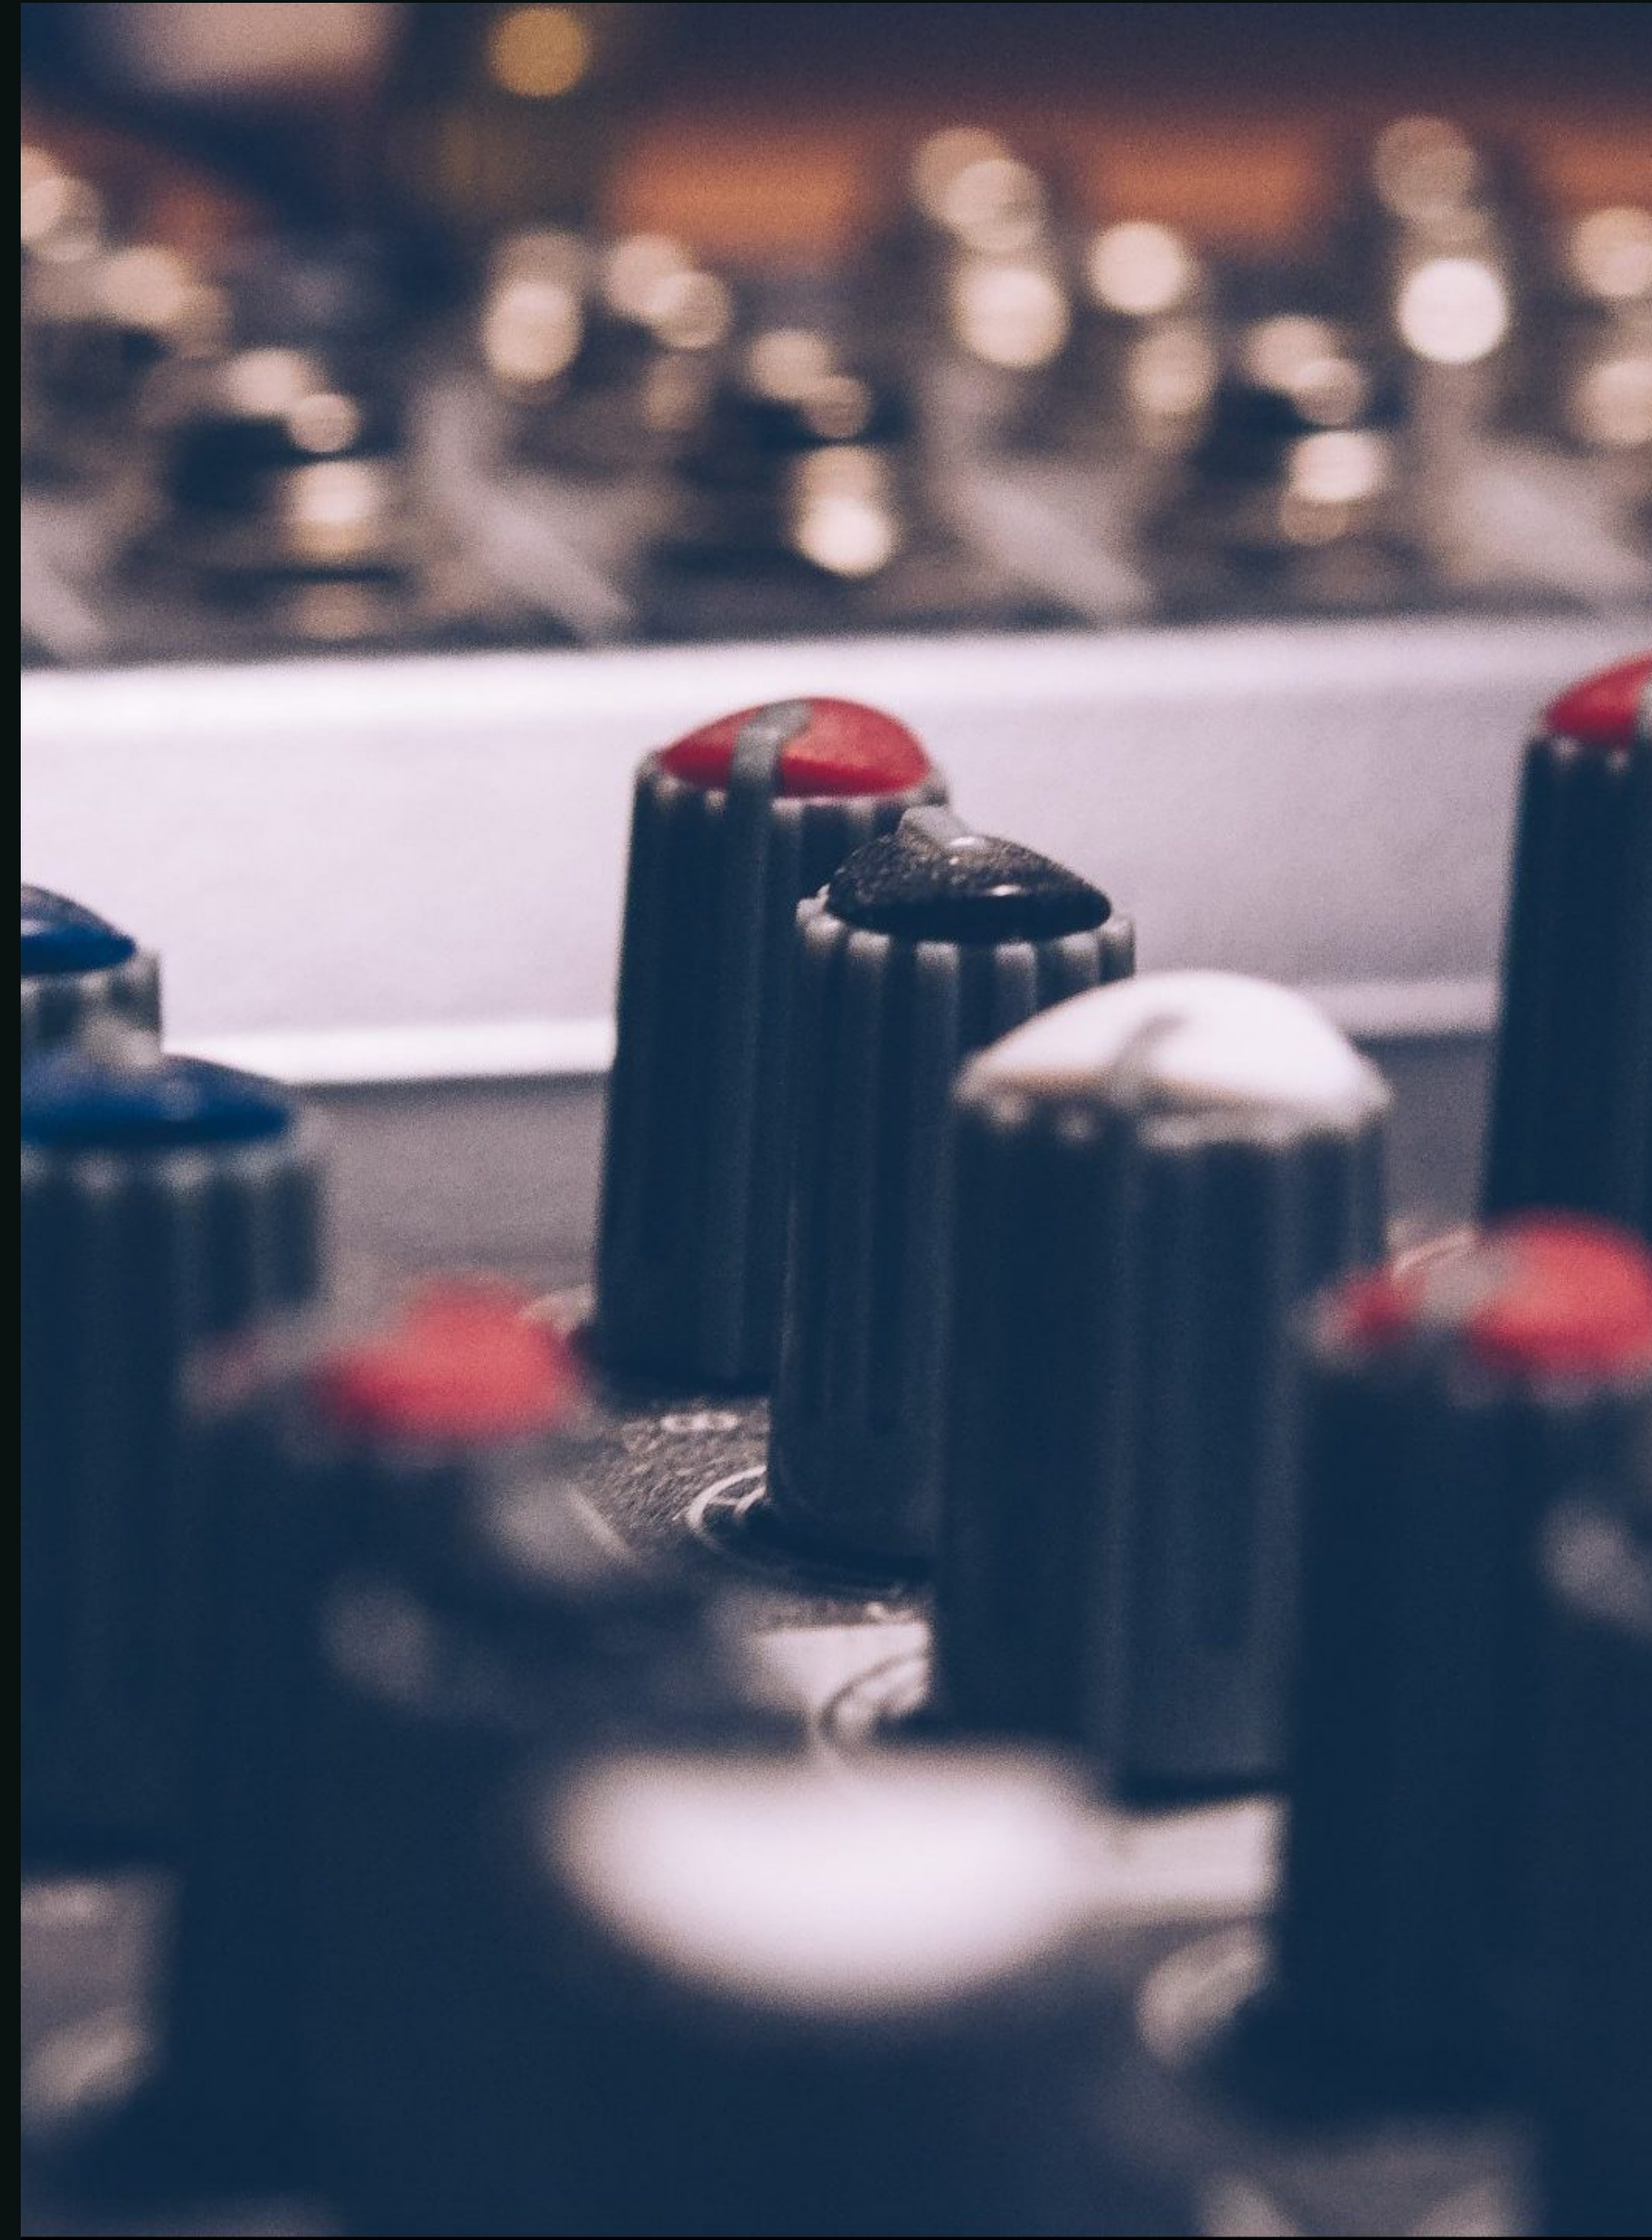

Mixing Basics (3-Day Course)

Overview

In this foundational course, we cover essential mixing skills and techniques that will set you up for success in any mixing project. This course combines theory with practical, hands-on examples to ensure participants gain confidence in every step of the mixing process.

Who Should Attend

Perfect for those new to mixing or those wanting to solidify their understanding of basic mixing principles. Suitable for musicians, audio engineers, and content creators who wish to elevate the quality of their audio productions.

Workshop Model 2

Mixing Basics Course

Essential Tools & Techniques

- ✓ **Understanding Core Elements of a DAW and Their Origins**
Gain a deep understanding of the foundational elements of a DAW and the reasons behind their design, rooted in analog console workflows
- ✓ **Fundamentals of Audio Physics in Mixing Tools**
Compression, EQ, and Saturation: Understand the physical principles behind these essential tools in mixing
- ✓ **Introduction to DAWs and Essential Plugins**
- ✓ **Organizing Your Mix Session for Efficiency**
- ✓ **Understanding the Role of Each Element in a Mix**

Delivery Options:

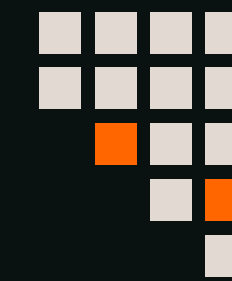

Online via Zoom/Teams, with real-time Q&A

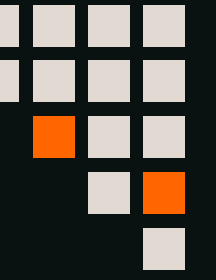

Onsite (for 3 to 5 participants)

Duration:

3 Days

DAY 1

Workshop Model 2

Mixing Basics Course

Building Blocks of a Mix

MIXING BASICS COURSE

- ✓ **Busses, Auxes, Sends, and Returns**
Learn about these essential DAW elements and their analog origins, understanding why and how they are used to streamline workflow, manage signals, and enhance creative control
- ✓ **Studio Tour - Real-World Analog Experience**
Visit a legendary analog studio with a world-renowned SSL mixing desk and explore the high-end studio environment. Gain hands-on experience with the layout and functionality of an SSL console, gain insight into outboard equipment such as compressors, EQs, and reverbs, and understand the workflow in a professional analog setting. This tour brings DAW principles to life by showing their roots in an analog context, providing practical, real-world insights into studio mixing. Although the workshop focuses on digital, in-the-box mixing, this tour offers insight into the origins of analog mixing that have shaped almost every plugin and DAW in use today
- ✓ **Equalisation & Compression Techniques / Fundamentals**
- ✓ **Panning & Stereo Imaging, Automation**
- ✓ **Signal Flow & Routing Essentials**

Delivery Options:

Online via Zoom/Teams, with real-time Q&A

Onsite (for 3 to 5 participants)

Duration:

3 Days

Workshop Model 2

Mixing Basics Course

Adding Depth and Finalization

- ✓ **Using Reverb and Delay for Depth**
Techniques for adding space and depth to mixes with reverb and delay, using each strategically for clarity and impact
- ✓ **Advanced Automation Techniques**
Exploring more advanced automation to enhance mix movement, emphasize transitions, and add dynamic interest
- ✓ **Creating Cohesion with Bus Processing**
Tips for using bus compression and EQ to create a unified sound across various mix elements
- ✓ **Finalizing and Exporting the Mix**
Step-by-step guidance on exporting mixes for different purposes, including preparing stems and ensuring the final product meets technical requirements

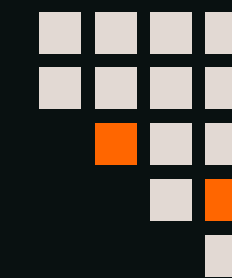

Delivery Options:

Online via Zoom/Teams, with real-time Q&A
Onsite (for 3 to 5 participants)

Duration:

3 Days

DAY 3

Workshop Model 3

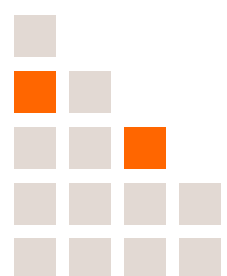

Mixing *Advanced* (3 Day Course)

Overview

For those ready to dive deep, this advanced course tackles complex mixing techniques and artistic choices that elevate mixes from good to exceptional. This course includes intensive hands-on sessions, where participants will work through advanced challenges, guided by real-time feedback and critiques.

Who Should Attend

Recommended for intermediate to advanced mixers who want to sharpen their skills, experiment with advanced techniques, and add unique character to their mixes.

Workshop Model 3

Mixing Advanced Course

Advanced Signal Processing and Techniques

DAY 1

Delivery Options:

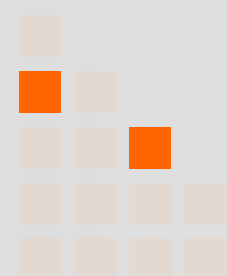

Online via Zoom/Teams, with real-time Q&A

Onsite (for 3 to 5 participants)

Duration:

3 Days

- ✓ **Tips and Tricks for Specific DAWs (Pro Tools, Logic Pro)**
Discover DAW-specific workflows, shortcuts, and tools tailored to each platform. Learn advanced techniques unique to Pro Tools and Logic Pro, focusing on efficiency and enhanced creative control
- ✓ **Multi-Band Compression and Parallel Processing**
Understand advanced signal processing techniques to add dynamic control and texture
- ✓ **Advanced EQ: Shaping Tone and Texture**
Techniques to achieve distinct tonal balance and adjust instrument separation across the mix.
- ✓ **Dealing with Phase and Frequency Conflicts**
Identify and address phase issues and frequency conflicts for clearer, more cohesive mixes

Workshop Model 3

Mixing Advanced Course

Creative and Artistic Mixing Choices

Focus on Saturation

Learn the role of saturation in solving mixing problems, creating warmth, and adding stylistic touches. Discover techniques for different types of saturation (tube, tape, and digital) and how they can be used creatively for specific genres

Simulating Analog Sound In-The-Box

Techniques for creating analog warmth and character using digital plugins, from console emulations to tape saturation

High-End Vocal Mixing

Deep dive into advanced vocal mixing techniques to create polished, professional vocal sounds. Emphasis is placed on vocals as the centerpiece of most non-instrumental mixes, covering EQ, compression, reverb, and delay techniques

Creating Depth and Space

Use reverb, delay, and stereo imaging to add a sense of dimension, placing each element in a unique space within the mix

DAY 2

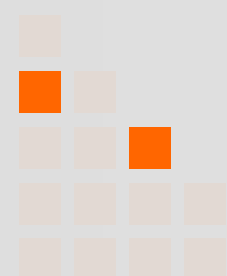

Delivery Options:

Online via Zoom/Teams, with real-time Q&A

Onsite (for 3 to 5 participants)

Duration:

3 Days

Workshop Model 3

Mixing Advanced Course

Finalizing and Perfecting the Mix

- ✓ **Importance of Individual Elements**
Learn to analyze the role of each instrument or element in a song and mix with purpose, giving importance to key elements for a balanced, dynamic sound
- ✓ **Mastering Transients for Power and Loudness**
Techniques for shaping transients to add punch and clarity, essential for achieving a powerful, loud mix without sacrificing dynamics
- ✓ **Advanced Automation and Dynamic Transitions**
Use automation to create movement and transitions, enhancing the emotional impact and flow of a song.
- ✓ **Preparing Mixes for Mastering**
Tips on setting up your mix for a smooth mastering process, including headroom, gain structure, and export settings
- ✓ **Real-Time Mix Review and Feedback Session**
Group critique session where participants receive professional feedback on their mixes to refine and improve their skills further

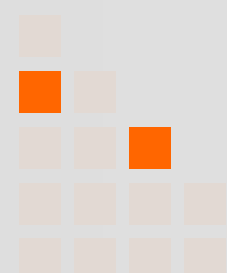

DAY 3

Delivery Options:

Online via Zoom/Teams, with real-time Q&A
Onsite (for 3 to 5 participants)

Duration:

3 Days
